- B. Early Arrival
- C. Daily Schedule

IV. COMMUNICATING AND REPORTING

V. OTHER INFORMATION

I. INTRODUCTION

The Summer Institute in Singapore for 2008 will be held during June 16th - August 8th 2008. The Summer Institute in Singapore is to provide U.S. graduate students (U.S. Citizens or permanent residents) in science and engineering first-hand research experience in Singapore, an introduction to the science and the science policy infrastructure of Singapore, and an orientation to the Singaporean culture and language. The primary goals of the program are to introduce students to Singaporean science and engineering in the context of a research laboratory, and to initiate personal relationships that will better enable them to collaborate with foreign counterparts in the future. The program is administered in the United States by the National Science Foundation (NSF) (<http://www.nsf.gov>, <http://www.nsf.gov/div/index.jsp?org=OISE>) with co-sponsorship in Singapore by the National Research Foundation (NRF) (<http://www.NRF.gov.sg>). The NRF office is a contact point for questions regarding issues such as visas, host institutions, travel in Singapore, and emergencies while the participants are in Singapore.

NSF Headquarters Office (Arlington)

Dr. Rick Nader, Program Manager

Dr. Andrew Backe, Program Specialist (PRIMARY POINT OF CONTACT)

Ms. Arletha Mayfield, Program Assistant

II. PREPARATION

A. Host Institutions and Researchers in Singapore

You should remember that host researchers or institutions will not be paid for hosting you. Therefore, your technical contributions to their program will be most appreciated. Many former Summer Institute participants have become highly recognized professionals after graduation and have continued their relationships with host researchers in many productive ways. A few tips

regarding host institutions and research plans are provided below.

Eight weeks pass very quickly, and every year participants say they wish they had more time to finish their research projects. Without advance planning, you may "waste" the first part of your stay discussing potential projects instead of working on the actual project itself. You are encouraged to contact host researchers and institutions as early as possible.

U.S. students are encouraged to give presentations to and/or exchange ideas with Singaporean researchers (not limited to host researchers and colleagues in host institutions) soon after they arrive. Your presentation will help introduce not only your research, but you're your home university in the U.S. Students are also encouraged to establish both personal and professional connections with Singaporean research institutions and researchers and actively participate in laboratory and field work, as well as academic seminars held in Singapore.

Research Plan

With the agreement of your host, you may choose to work on research described in your proposal, become involved in your host's on-going research, or start a new research project. If you choose to work on a new research topic, you should include specific information about the change in scope in your Final Report to NSF. Please keep in mind that you may not have tangible results at the end of an eight-week period for overly ambitious research plans.

To make your research visit to Singapore productive, you may want to consider the following:

- Team-up with a graduate student in your host's research group.
- Read your host's publications and understand the methods and approaches.
- Consult with your host researcher before you arrive in Singapore and come to a mutual understanding about the scope and expected results of your work.

Facilities

While discussing your research plan, you should check with the host researcher to see if required equipment, facilities, and/or materials required for your research will be available to you during your visit. Because the months of June till August are usually summer vacation in Singapore, many students and faculty members will be out of their offices and some laboratories may close down equipment and facilities for renovation or cleaning.

Other information

Possibly the most useful information about how to survive at your host institution is from US students, research staff, or visiting faculty who have been or are currently in Singapore. You might ask your host researcher to send you contact information for current or previous U.S. researchers from the host institution. You should also ask for information about possible professional visits during your stay (see section B) and housing arrangements (see section F).

B. How to set up other professional visits.

NSF and NRF encourage participants to visit laboratories outside of their host laboratory both to gain a broader understanding of the Singaporean scientific community and to create contacts for future research collaboration. You should be aware that cultural differences between the United States and Singapore become extremely salient when it comes to setting up visits to other laboratories. In Singapore, introductions are helpful prior to visits, and a mutually known third party typically makes these.

Main resources for developing contacts in Singapore are:

1. Your advisor, professors, and colleagues in the United States

Consult with your U.S. advisor and/or other appropriate individuals before you leave home and develop a list of researchers you would like to meet while in Singapore. Letters of introduction provided by your U.S.-based advisor are extremely useful in setting up research visits with researchers.

2. Your Singaporean host

Prior to your arrival, you should inform your host that you are interested in visiting other laboratories in Singapore and ask them if they have suggestions for which researchers would be beneficial to meet. If the host responds to this request, you can then politely ask if they would be willing to make the necessary introductions for you.

3. Summer Program alumni and U.S. researchers currently in Singapore

You may also get information about professional visits from former Summer Institute participants or from NSF grantees who have collaborations with Singaporean researchers in your area of interest (see <http://www.nsf.gov/>) and search the public abstracts.

4. Publication search

A publication search can help identify Singaporean researchers within your field. In this case, you

might send, fax or e-mail a polite note that introduces yourself, explains your research, and request a visit while you are in Singapore. Note, however, that this is not the normal way of doing business in Singapore and you should be prepared for no response from some of your contacts.

C. Passport and Visa

You will need a valid passport for travel to the Republic of Singapore. For U.S. passports, application instructions and forms are available at the State Department Web site: <http://travel.state.gov/>. You can request expedited processing with an additional fee.

US citizens are not required to produce a visa to visit Singapore, if staying no more than 90 days for social visitation purposes. They are, however, required to possess a passport with at least 6 months' validity, onward/return ticket, entry facilities to next destination, and sufficient funds to stay in Singapore. For additional information, please visit <http://www.mfa.gov.sg/>, http://app.ica.gov.sg/travellers/entry/entry_requirements.asp, and <http://singapore.usembassy.gov/>

You should check with the Singaporean embassy nearest you to make sure all your documentation is in order. Singapore embassies are located in Washington D.C., Chicago, New York, Miami, Florida, Houston, and San Francisco.

D. International Travel Allowance

In 2008, NSF will include an allowance for international travel in EAPSI participants' awards. This allowance may be used for purchasing an economy class, round-trip airline ticket and other costs associated with international travel between the participant's originating point in the U.S. (typically home or academic institution) and the airport designated by the host location. Students are restricted to U.S. Flag carriers or U.S. carrier tickets on code share airlines. Other restrictions pertaining to the international travel allowance may apply.

E. Stipend

NSF \$5,000 Stipend

An official NSF award letter will be issued to you by the Division of Grants and Agreements. The award notification will include instructions about how to request electronic transfer of the \$5,000 stipend. Additionally, students who attend the pre-departure orientation will be reimbursed the costs of attending through their awards.

Questions concerning tax liabilities cannot be answered by NSF and should be directed to the Internal Revenue Service.

As a recipient of the \$5,000, you must make sure you will not be "double-funded" from NSF or other federal sources. This restriction applies to ANY federal source. Consult with your advisor, your fellowship coordinator or contact NSF to verify. For example, if you are a recipient of an NSF-sponsored Graduate Research Fellowship (GRF) award, you should consult with your university's Coordinating Official (CO) for the Graduate Research Fellowship and your advisor

about whether or not to accept the GRF stipend or the EAPSI stipend. If you decide to continue to receive a non-EAPSI federal stipend during the Summer Institute period (the typical case), then you will be issued a zero dollar NSF Summer Institute award (i.e., you will not receive the EAPSI stipend). However, you will still receive the airline ticket through the Summer Institute program and in-country living expenses from the counterpart science agency.

Living Allowance in Singapore

NRF will provide you with a living allowance of \$4000 Singapore dollars. This \$4000 is to cover your transportation, food, accommodation and miscellaneous expenses during your 8-week stay in Singapore. This amount will be dispensed to you during your orientation.

You are advised to bring at least U.S. \$500 to cover extra expenses not supported by NRF.

F. Housing Arrangements

Your host institution will help to arrange for your accommodation needs. If, however, you wish to make your own housing arrangements other than those provided by the host institution, you need to notify your host institution as soon as possible.

G. Insurance

Upon arriving on Singapore soil, you will automatically be insured by your host institution. Details of the insurance coverage and claims procedure will be provided to you during the orientation in Singapore.

H. Intellectual Property Rights (IPR)

NSF and NRF do not anticipate that the Summer Institute in Singapore, undertaken pursuant to the memorandum of understanding between NSF and NRF exchanged in May 2007, will result in the creation of intellectual property. If you wish to negotiate IPR provisions, you should work out arrangements with your host researcher and responsible officials at your host institution BEFORE you go to Singapore.

I. Mobile Phones

You may want to arrange for mobile phone service during your stay in Singapore, particularly since the use of such phones has become ubiquitous. Mobile phones may be purchased and temporary, prepaid service arranged through companies such as Singtel, Starhub and M1. Your host scientist can direct you to the local office of one of these companies after your arrival.

J. Health and Safety

For your general health, consider the following, as appropriate:

If you wear eyeglasses or contact lenses, bring an extra pair of glasses or contact lenses with you for backup. You may also wish to bring a copy of your corrective lens prescription in the event you must have glasses made. Don't count on finding your specific brands of eye care products overseas--take them with you.

If you take prescription medications regularly, and will be traveling with prescription drugs, bring a signed script or letter from your physician indicating your medical need(s) for the drug(s) and identify the drug(s) you will possess while traveling. If you require insulin and syringes, or have allergies and require epinephrine pens, you should look into the requirements for international travel with these paraphernalia.

Please consult your personal health care provider about your trip (destination and time abroad). Ask your health provider to review your vaccination record and any other medical needs you might have. You should do this at least 4-6 weeks prior to departure.

The U.S. Government's Centers for Disease Control and Prevention (CDC) maintain a traveler's Web site with health information and travel advisories; the URL is <http://www.cdc.gov/travel/>

Please review travel safety information and guidelines can be accessed at:
http://travel.state.gov/travel/tips/safety/safety_1747.html

A comprehensive set of tips is available at <http://www.tsa.gov/travelers/index.shtm>.

You are also encouraged to register upon arrival with the U.S. Embassy in Singapore at <http://singapore.usembassy.gov/>.

III. TRAVEL AND LOGISTICS

A. Arrival

All participants in the Summer Institute (SI) are expected to arrive at Changi International Airport on 14th or 15th June 2008 and stay in Singapore for the entirety of the SI. They will take a cab to the accommodation provided by their host institution from the airport.

B. Early Arrival

For participants who will be traveling in Singapore prior to the start of the Program, it may be convenient for you to have the bulk of your luggage delivered directly to your host institution from Changi International Airport at your own expense. Check out services available at <http://www.changiairport.com/>. If you plan to arrive prior to the start date, please notify Ms. CHUA Ipein of NRF and Dr. Andrew Backe of NSF.

C. Daily Schedule

The Opening Ceremony will be held at the National University of Singapore (NUS) while the closing Ceremony will be held at the Nanyang Technological University (NTU). The orientation program is scheduled for 5 days and is summarized below:

Day 1 (16th Jun): Opening ceremony + Orientation to Singapore (culture, transportation, food, etc)

Day 2 (17th Jun): Tour of NUS; Tour of NTU

Day 3 (18th Jun): Tour of A*Star research institutes; Tour of Singapore

Day 4 (19th Jun): Tour of Singapore

Day 5 (8th Aug): Report presentation; Closing ceremony; Departure

IV. COMMUNICATING AND REPORTING

It is important to keep your host, NRF and NSF Arlington informed of any problems or proposed changes in your EAPSI plan. If there are problems during the stay in Singapore, please cc KEY PERSONS:

Dr. Andrew Backe abacke@nsf.gov

CHUA Ipein Chua_Ipein@nrf.gov.sg

Cc your Singapore host and U.S. advisor

Report

Participants are required to submit a Final Report to NSF and their host institutions no later than **December 1, 2008**. Reports to NSF must be submitted electronically via the NSF Fast Lane system.

V. OTHER INFORMATION

1. The fellowship will not be given to the participants if:
 - (a) a false statement is found in the application documents.
 - (b) an applicant's participation is cancelled by the host location.
2. You are strongly encouraged to keep your host researchers/advisors advised of progress in your application status and build mutual expectations about your research plan.
